ACCESS™

BECAUSE NOTHING SHOULD COME BETWEEN YOU AND BETTER HEARING

Beltone

ACCESS™

HEARING SATISFACTION FOR MORE PEOPLE

With Beltone ACCESS, you get the latest technology and everything you need for a quality hearing solution. Beltone ACCESS offers great value for the price.

ACCESS TO QUALITY HEARING CARE

Get a quality hearing aid that meets your needs

Beltone believes that everybody should have access to quality hearing. That is why Beltone ACCESS is built to give you the benefits that, until now, could only be found in more expensive hearing aids. Now you can experience clear and natural hearing.

With Beltone ACCESS, you will be able to:

- Hear the wind blowing in the trees and the whispers of children
- Follow conversations even in noisy situations
- Feel at ease as sudden loud sounds are adjusted to a level that is comfortable for you

ACCESS TO CONVENIENCE

Feel comfortable and confident

Beltone understands that better hearing is about feeling comfortable and safe in many different situations – and not just about amplifying sounds.

Great hearing, even in noisy situations

The Speech Pattern Detection feature in Beltone ACCESS automatically reduces background noise so you get a more clear sound experience. At the same time, the directional microphones help you focus on sounds coming from in front of you. That makes it easier to understand face-to-face conversations.

With these features, Beltone ACCESS makes you feel more confident whether you're talking to your relatives and friends or asking for assistance in the local supermarket.

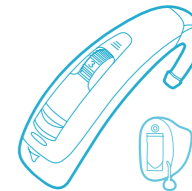

Protection from echoes and whistling

Sometimes hearing aids can produce whistles or echoes. Beltone ACCESS is designed to avoid such unpleasant situations – it lets you hear both soft and loud sounds in a natural and comfortable way. Our Feedback Management system makes sure of this.

Easily adjustable for any situation

Beltone ACCESS has different programs that can be tailored to your needs and lifestyle. You can manually switch between these programs, for instance, when you are in a social setting, out on the street or watching television. You can also get a Beltone ACCESS with a volume control that you can adjust manually at any time.

ACCESS[™]

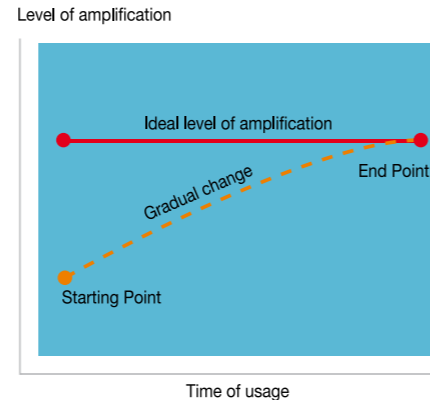

ACCESS TO HEARING SATISFACTION

Get used to your newly improved hearing gradually

Belton ACCESS can be set to adjust itself over time to reach the level that is optimal for you. You start at the level you prefer when you first visit your hearing care professional. Then, during the first weeks of use, the hearing aid will automatically make adjustments to give you the best possible hearing. This function is called Satisfy.

The hearing aid also has a Satisfaction Journal that registers which programs you use and which volume levels you prefer. Then your hearing care professional can optimize the fitting of your hearing aid accordingly. You don't need to worry about remembering or explaining what you feel most comfortable with.

STYLES AND SHAPES

Belton ACCESS offers a variety of styles and shapes so you can choose the hearing aid that best fits your hearing loss and personal needs.

BTE
ACS75 / ACS75D

POWER BTE
ACS85 / ACS85D

BTE

This type of hearing aid sits discretely behind your ear. Its shape makes you so comfortable that you eventually forget you are wearing it.

CIC

This is a Completely-In-The-Canal hearing aid, which is very discrete and barely visible.

CIC
ACS15 / ACS15 HPG

MC
ACS25 / ACS25 HPG

ITC
ACS35 / ACS35 HPG
ACS35D / ACS35D HPG

ITE
ACS45 / ACS45 HPG
ACS45D / ACS45D HPG
